Software Developer-Statistics

Opencode Systems is a telecommunications solution provider, dedicated to open systems for All-G and Telco-over-Cloud mobile networks. Our specialized core network technology is invisible to consumers but underlies many of the mobile services they use.

Opencode real-time core network products include Multi-Channel Network Browser & Studio, iSDP (IMS Service Delivery Platform), Network Services Broker, Core Messaging Suite, Carrier App Browser and other first-to-market specialized solutions. Over 60 active mobile operators in more than 40 countries worldwide rely 24/7 on Opencode core network platforms. Opencode patented, game-changing, network- and cloud-driven virtualized technology is the preferred choice for the open and creative mobile network.

Due to expanding its activities the company is looking for highly motivated energetic person for the position of **Software Developer - Statistics**. This challenging position will give you the opportunity to work on tasks related to manipulation and storage of large amounts of data.

Main Responsibilities:
• Create and maintain statistics and data reports for our customers
• Solve complex problems
• Maintain and expand existing tools and software
• Write good and clear code

Requirements:
• Proficiency in PHP programming
• Good knowledge of MySQL Databases
• Linux OS
• Git
• Good analytic skills
• Motivation for learning new technologies
• Good English

Additional Skills and Qualifications considered as an advantage:
• Previous experience with statistics and big data
• JavaScript/NodeJS
• Experience with other scripting languages such as Perl and Python
• NoSQL databases
• Yii2 Framework

We offer:
• An attractive remuneration package with a bonus system for performance.
• Dynamic opportunities for professional and personal growth.
• Working in an international environment of qualified professionals.
• The opportunity to work on projects in a market-leading and growing company and participate in the development of world-market innovative services.
